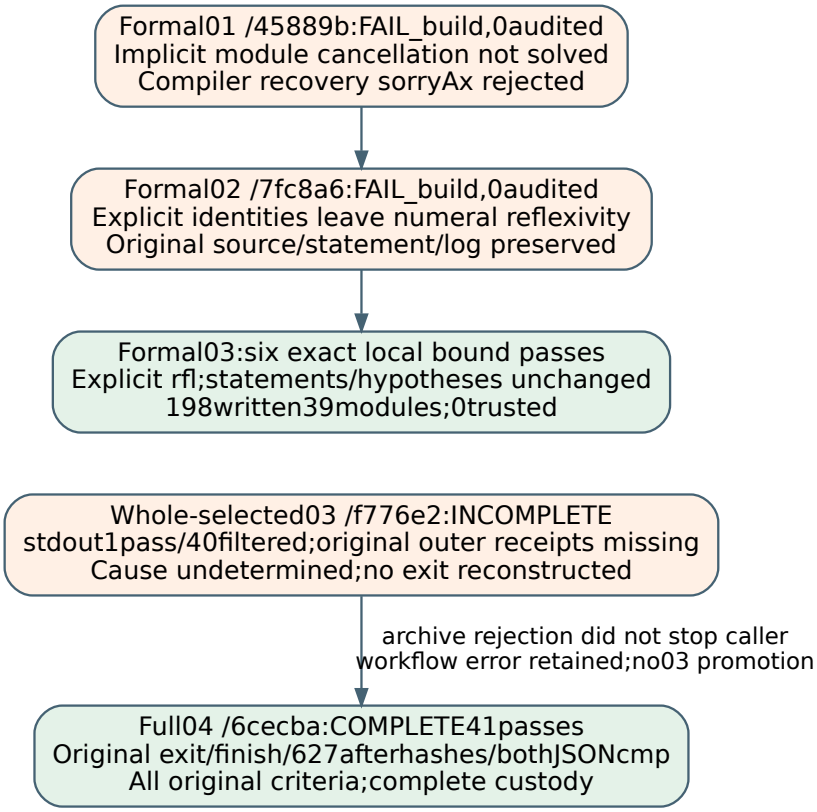
Retained proof failures and incomplete native receipt

2026-11-12 · proper C20→T20 phaseB · unsigned



Distinct formal and native attempts;arrows describe corrections and receipt history,not missing measurements. Every failed source/log is retained. [pcc:unverified]

Formal01/45889b fails to close abstract module cancellation and coefficient difference. Formal02/7fc8a6 adds explicit scalar identities but leaves 4·x=(2+2)·x. Both gates fail before auditing any declaration;compiler recovery sorryAx is rejected. Formal03 adds explicit reflexivity under unchanged statements/hypotheses. Six exact bound local passes cover order-based recovery/sign and canonical branch-pair arithmetic;0trusted. Actual Picard/polarization claims remain written/native bridges. [pcc:unverified]

Failed02 claim text has an accidental842? placeholder. Additive76b1b9 identifies the accepted full-native claim as6cecba. No original claim, source,log or ledger entry is rewritten. [pcc:unverified]

Whole-selected03/f776e2 prints1pass/40filtered and all12317 chain checks, but the original outer exit,finish and afterhash receipts are missing. The tool registry reports unknown session38584;cause is undetermined. A late627-hash check is labeled late. It cannot replace those receipts, and03 is not accepted. Its complete stdout/source/start/XZ/hash/roundtrip remain available. [pcc:unverified]

The archive helper correctly rejects missing exit,but its shell caller continues after that failure and a later copy returns0. Full04 therefore launches before the incomplete03 checkpoint. This workflow error is recorded without inventing a03 exit. Full04 then completes41 tests, original exit/finish/all627afterhashes and both old JSON comparisons. No frozen acceptance criterion is relaxed. Dependent archive/launch commands must stop on failure;inspect actual receipts on registry loss. [pcc:unverified]

LocalLinuxx86_64 development;Rust1.99.1/Lean4.35.0. No speed measurement, mathematical impossibility,execution signature or paid-run claim. REPORT.md links each original failure tree,correction and accepted run, plus editableDOT/SVG/renderer/Typst and this inspected final PDF. [pcc:unverified]
