Run report: run-20261023T0032Z (sharded re-run of the study's sessions)

A descriptive record of the run. The results report is `../../speedups-20261023/README.md`.

What ran

item	value
build	`run_pipeline.sh build speedups-20261023/rerun-sharded 52 6 16384 20261022 2 6 4 2 3` (`rerun-sharded-20261023` when it ran; the directory was moved afterwards)
run	`run_pipeline.sh run`: five `ecbench run --cpus none --allow-busy` sessions, concurrently
start / end (UTC, `session.json`)	all started 00:32:17; ended 00:39:06 (BSGS), 00:44:12, 00:44:21, 00:44:24 (shards 0–2), 00:44:31 (A/A), 2026-10-23
host	Intel Xeon Processor @ 2.10 GHz, 4 vCPU shared cloud VM, Linux; isolation L0
ecbench binary	sha256 `4652d20005e16255…` (in each `session.json`); sessions' git `bec9df9e`, dirty (the registry cache and `--shards`, committed as `0bf3db1a3`)
seeds	measurement seed 20261022; A/A ⊕ `0xAA0000000`; target law `planted_shared`, target seed 20261022

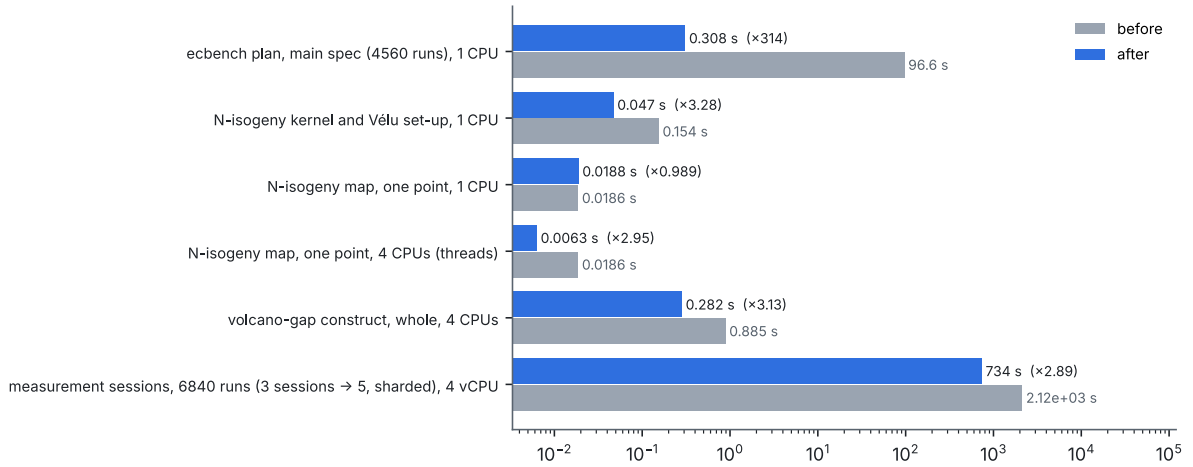

Sessions

session	spec	runs recorded	status	audit (`--replay 8`)
`ECBS1h14d98bf2a3ec`	`spec-shard0` (`rho.negation`)	1524	1524 verified	OK, 8 replays exact
`ECBS1h846ee50776a9`	`spec-shard1`	1518	1518 verified	OK
`ECBS1hd4816b5f840b`	`spec-shard2`	1518	1518 verified	OK
`ECBS1h0246a995e87e`	`spec-aa`	1520	1520 verified	OK
`ECBS1hd719e0366969`	`spec-bsgs`	760	760 verified	OK

No run failed or timed out.

Recorded values

quantity	value
records, original run / this run	6840 / 6840
per-record identity	identical by (arm, workload, target, round, warmup, total GAE, recovered value, counters): `compare.sh`, both sides hash to `7bedc5cc055f…` (`compare.sha256`)
span, first start to last end	734 s; the original run's three sessions spanned 2120 s (2026-10-22)

Raw records

- `../../speedups-20261023/rerun-sharded/sessions/*/records.jsonl.gz`, pinned uncompressed by `../../speedups-20261023/MANIFEST.sha256`
- `session.json`, `host.json`, `spec.json`, `plan.json.gz` in each session directory
- `../../speedups-20261023/rerun-sharded/specs/`, `pair.json`, build logs
