R122: fourth F4 translation of marked23 y0/e3

5 November 2026 | exact R121 supports | one base place

Translate U=s(delta+V) on the final repeated eight-root edge.

y0_e3: translated orders [4, 2, 11, 0, 24]

y0/e3 splits: 1 correction of order 2, 7 of order 2/7.

All four x=0 base places now have a tame seven-root edge.

The leading F4 correction is 1 and is Frobenius-fixed.

Independent F4 table and finite Lean edge checks: pass.

Next: normalized branch census and N51 valuation.
