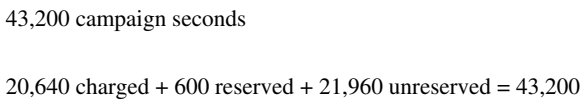
Cast successor final numeric readback


The final freeze changes exactly the two accounting fields from null to20640charged and22560remaining. The600-second reservation leaves21960unreserved of43200. All18 frozen source/control/runtime packet file hashes match. Saved native helper phases report terminal owners; ledger and serial receipt hashes match. No proof or payload was rerun. Publication/release remain parent-controlled.
