Actual Hermite basis E_t
integral local product; unit constant 1
Actual centered-grid involution
valuation pairing and all source levels
Constructed reciprocal
finite mapped inverse buffer
Finite second moment <= 6 D_i
v2(E_t(0)) >= -6 h D_i
Explicit integral evaluation numerator
loss at most 4 M (a + 1)
Original p_t = p + 8 h D_i + 8 M (a + 1)
actual finite-functional error lies in 2^p O
OPEN: exact reconstruction from input jets
coordinate and bit-cost refinement
