R129: normalized degree-7 base fiber

Direct lift: s=x-a=6u^2+21u^3+...; u=y+90

F(s(u),u)=0 mod u^128; transverse derivative 84 is a unit

Source factor	Weighted degree	(residue degree, e)
Y+123	7	(7,1)
Y+90	14	(7,2)
Q4	28	(28,1)

Complete base-fiber degree: 7+14+28=49.

Checks: independent direct-source lift, 128 residual coefficients, Lean arithmetic.

First 16-update cap failed before output; amended source converged in 33 updates.

Result SHA-256: 386eb38c51c8f0da0bb8d184ab91709bb1865235d6f6ea2068292713bd8d9e52

Next: degree-16 lambda extension and N51 at these three base places.
