Same actual completed W; arbitrary retained node t
Existing nonzero diagonal c; local first jet may vanish
Actual row polynomial identity
Derived D*P=N, D-1 content 1; integral P,N
Actual reciprocal first-jet family
Constructed 2^u*k moment factors; weights w+b
S_k = sum (1-D)^n, n<k
Whole-polynomial error k; scaled error w+k
Explicit per-entry approximation N*S_k
Degree <= representative chart degree + k
OPEN: compact whole-polynomial matrix factors
Bivariate H coefficients, all labels and original mode costs
