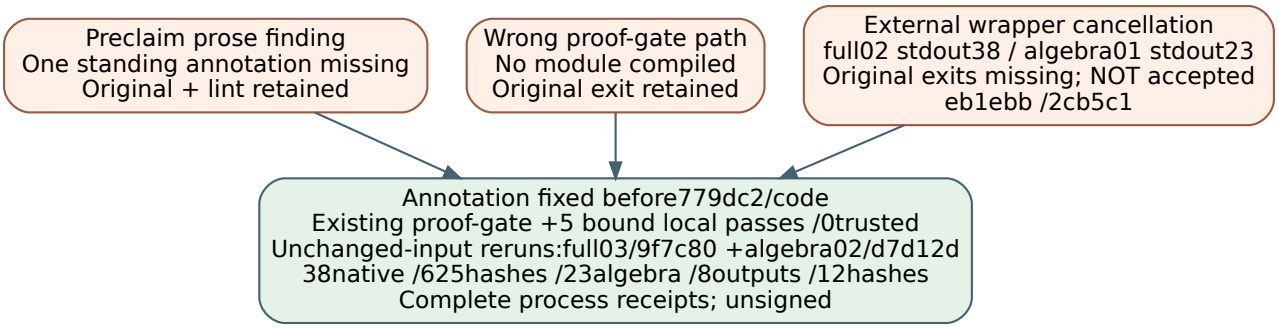
Retained kernel-stage invocation failures

2026-11-12 · no changed criteria · final full38 /9f7c80 · unsigned



LocalLinuxx86_64development checks,no benchmark isolation. Actual invocation failures and corrections,not timing comparisons. Both interrupted runs retain their original source/raw/start data;missing exit receipts are not reconstructed. Scientific standing remains unsigned. [pcc:unverified]

Initial protocol and CLI path

Before779dc2,the prose gate found one missing standing annotation. Complete original source/lint is retained;only annotation changed before native code. An attempted tools/pcc/lean_gate.py did not exist and never compiled Lean. Its stdout/exit/scope remain in kernel-tool-invocation-failed-01. Correct tools/lean/proof-gate.sh gate03 passes5 declarations,zero trusted;all five exact statement bindings locally pass. [pcc:unverified]

Interrupted outer wrappers

External functions.exec cancellation removed running outer wrappers. Full02 prints38-pass test stdout,but its original exit/finished/afterhash receipt is missing. Later625 hashes and certificate comparison pass and are labeled late evidence. eb1ebb retains complete raw/source/JSON/start/ XZ/ hash/roundtrip;the whole invocation is not accepted. Algebra01 prints23 passes,but its eight-output issuer phase and exit are incomplete;2cb5c1 retains the source/log/start and is not accepted. No missing exit is inferred from stdout. [pcc:unverified]

Complete unchanged-input reruns

Full03/9f7c80 passes38/zero failedignoredfiltered,old reference+legacy guards/fmt/strictClippy/all625 hashes and byte-identical24475-byte JSON. Algebra02/d7d12d passes23/eight outputs/all12 hashes,old7 outputs byte-identical. Native wrong55 control gives42different7equal as frozen. No native mathematical prediction failed;no old test or condition was removed. Actual geometry proof063773 states remaining written bridges. No paid run,benchmark,scientific signature or history rewrite. REPORT.md links all original evidence,main report and editable figure. [pcc:unverified]
