Public rational-point base
Fixed abscissas AND fixed square roots
Actual monic norm N = A^2 - f B^2
N divides the public nodal product
Derive successful support S from N
Split, separable, |S| = 2a
PCC-20261114-20a4bc (unsigned)
Derive either sign at each selected node
Low-degree cross product vanishes
Same norm + monic normalization
A and B fixed by endomorphism
PCC-20261114-8c21e7 (unsigned)
Frobenius fixed coefficients lie in prime subfield
Actual core: PCC-20261114-5d35b3 (unsigned)
no solver-cost inference
Open: coverage, public finder, full closure
Extraction and complete expected bit cost
