Action-tagged pair index · direct · p=13

Run ID: `run-20261022T0707Z-quartic-tagged-direct-p13`. Intel Xeon 6975P-C, 32 logical CPUs; shared-host L0. One known-answer target and 7 registered residual queries. Full and tagged tables returned identical complete signed decomposition sets on every query; 5,112 postings passed an independent group-addition audit. The non-timing A/A diff is empty.

phase	F_p multiplications	group operations
full setup	495,864	5,112
tagged setup	154,922	426
full queries	7,029,782	72,576
tagged queries	7,029,782	72,576

Retained requested bytes: full 1,273,360; tagged 681,932. Setup and query counts exclude common input preparation and the audit. L0 wall times are shared-host diagnostics, not isolated speed evidence. Whole IC, polynomial relation finding, rho and external tools are not measured here. Source, command and raw data are linked in `README.md`.
