Exact Markowitz pivot priority: p=739 gate

60 frozen targets · source and rho scalars verified · fresh replay

solver	row updates	index ops	cost / rho
Peel	1,336,284	9,475,326	11.615357
Markowitz	1,307,655	17,513,708	13.994822

Representative Markowitz/peel cold cost: 1.204855.

Across 36 pricing cells: 0 below peel; 0 below matched source rho.

Markowitz/peel range: 1.000000–1.248952.

The full CSV retains all cells, including equality and higher prices.

The graph shows the S/M=0.5 slice for all four inversion prices.

The p=186,379 target-0 resource diagnostic is recorded separately.

Native raw JSONL, paired grid, replay, source checks, and frozen protocol accompany this PDF.
