Prime p > 3; distinct base abscissas
curve/point hypotheses; polynomial UNSAT
CHECKED: actual six inputs
degree-four pair/cubic reduction
CHECKED: rational quadratic roots
UNSAT implies nonzero scalar resultant
CHECKED: explicit interpolation inverse
staged monic normalization at degree 5
CHECKED: actual degrees and top map
first non-Koszul relation at degree 4
CHECKED: affine-grid shifts
staged scalar resultant at degree 5
CHECKED: uniform separating space
1 not in V(F,4)
CHECKED: nine-point inverse
actual degree-five refutation
CHECKED: exact last fall 5
unit ideal follows from refutation
KERNEL-CHECKED: exact pair (4,5)
GuardedExactPair.exact_pair_prime
