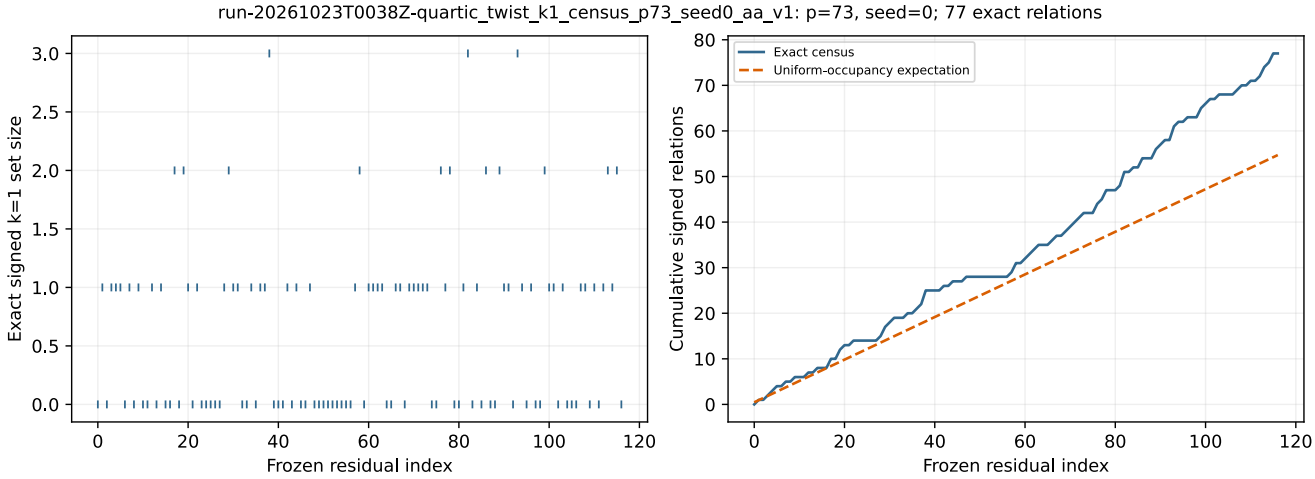
## Recorded observations

- Exact point-keyed group census and independent scalar-keyed audit both pass: 77 signed k=1 relations across 117 frozen residuals; 57 have zero.
- First hit at zero-based query 1; uniform-occupancy heuristic 54.708 relations, observed/heuristic 1.407.
- Independent BSGS verified 96 physical factor logs and the target log using a 5330-point baby table; all 117 complete signed-set digests match.
- Point-keyed census charged 437,664 setup and 106,603,795 query Fp multiplications; these are reference-oracle costs, not polynomial IC costs.



Dashed expectation is a first-moment heuristic, not a fitted model or confidence interval. Group-oracle work is outside candidate IC cost.
