R109: N51 on the four x=1 branches

5 November 2026 | 105 exact rational terms

y=0, degree 1: unique leading u^0; v(n)=0.

y=1, degree 1: unique leading u^0; v(n)=0.

y=0, degree 7: u^0 and s^-23 u^7 cancel at weight zero.

y=1, degree 7: u^0 and s^-23 u^7 cancel at weight zero.

Degree-7 valuations remain open; lift the local branch next.

Fresh replay, changed donor rejection, independent Hasse check: pass.

Lean finite weighted-minimum and F2 cancellation lemmas: pass.

First verifier indexing error corrected; producer/replay had no failure.
