R116: four x=0 base series through order 640

5 November 2026 | exact marked-23 degree-7 base equation

All four local transformed equations have simple roots.

All four root series and original f residuals vanish mod s^640.

x orders are 1,3,1,2 across the four places.

x^161 pulls back to orders 161,483,161,322.

Minimum input margin beyond the denominator is 157.

Next: evaluate actual combined G51 coefficients and bounds.

Fresh replay, altered-source rejection, independent source expansion: pass.

Lean finite support arithmetic: pass.

Lean checked all four finite residuals at order 640.
