Actual-quintic nonbranch norm-order: module compiled

Phase4 producer software validation | 2026-11-03

Corrected scalar-map and norm proof bodies compiled: Nonbranch exit0.

Ten declarations retain explicit actual-quintic, separability, nonbranch,

nonzero determinant, valid-divisibility and branch-selection assumptions.

Nonbranch finished at267.297s of270s work; Controls began267.302s.

Controls hit the work cutoff: exit-9; both children reaped; cleanuperrors empty.

Four controls and14named axiom readbacks remain incomplete in this attempt.

The prior four elaboration errors and cutoff attempts remain preserved.

Fresh full pre/post custody matched16,736files /3,111,892,318bytes.

pre: exit0, 129.573889s

compiler: exit1, 271.864298s

post: exit0, 152.232015s

Graph: recorded phase wall seconds; one observation each, no timing inference.

Next: reuse exact compiled Nonbranch.olean for retained controls and axiom readback.

Independent source-fidelity review remains separate. No scientific trajectories.
