F5: f = X5 - X
monic, degree 5, derivative -1
separable
Every actual reduced pair
has a unique coefficient shape
651 candidates
Actual monic division
proved equivalent to scalar conditions
exact quotient/remainder rewrite
Kernel finite enumeration
16 valid pairs; every v = 0
Every valid quadratic u has a root
proved scalar classification +
actual polynomial factorization
All 16 actual u split
exact control: 16 / 16
Native calibration still requires
source + protocol committed before data
Separate open bridge
geometric Picard/Jacobian identification
