R121: third F4 translation of marked23 y0 edges

5 November 2026 | exact R120 supports | two y0 base places

Translate W=s^m(gamma+U) on the remaining eight-root edges.

y0_e1: translated orders [6, 2, 11, 0, 24]

y0_e3: translated orders [8, 9, 15, 0, 16]

y0/e1 splits: 1 correction of order 4, 7 of order 2/7.

y0/e3 remains repeated: 8 next corrections of order 1.

Three base places now exhibit a tame seven-root branch.

Independent F4 table and finite Lean edge checks: pass.

Next: lift y0/e3; evaluate N51 on normalized branches.
