# R124: first N51 leading forms at x=0

5 November 2026 | 105 actual rational terms | order 640

All four weighted F4 leading sums cancel exactly.

y0_e1: candidate s-order=-53, sum=0

y0_e3: candidate s-order=-44, sum=0

y1_e1: candidate s-order=-23, sum=0

y1_e2: candidate s-order=-23, sum=0

The 11 tied powers form (1+T+T^2)^7 over F2.

No source-precision competitor; each cancellation is exact.

Independent 105-term long division and Lean identity: pass.

Next: evaluate N51 after branch-specific lambda corrections.
