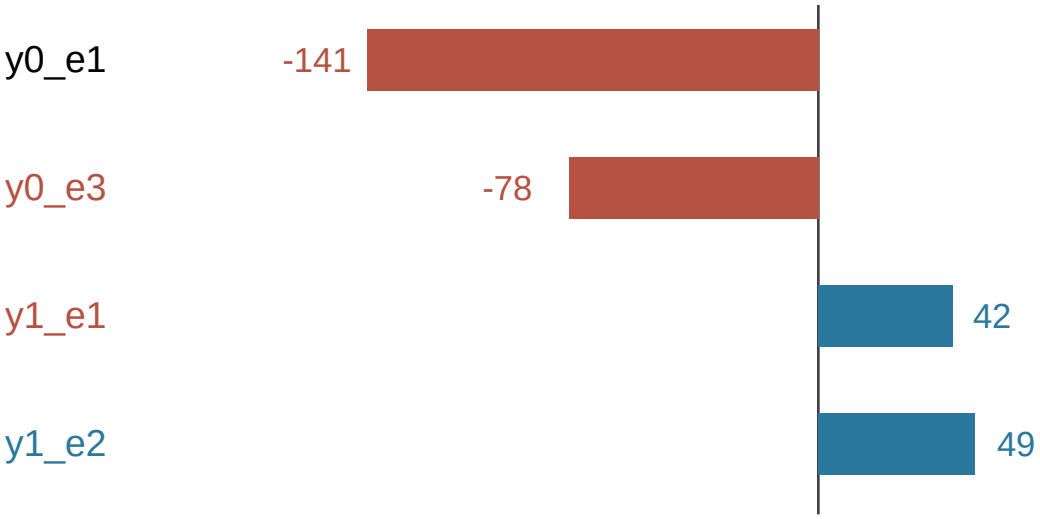
R126: N51 on the x=0 tame-seven places

Exact normalized local orders; two F4 roots per residue-degree-2 place



Combined with R125 simple orders: x=0 degree-weighted contribution = -358

Checks: independent F4 lift, byte replay, changed-source rejection, Lean finite proof

Result SHA-256: 40cb7e162ee63d0ff61c3774e2a1c1e0893b7a61e7b18d4a4fd32e3437318672

Source/protocol commit: a56e7b28ca9ededc8d7e62be2e4955b29a929445

Next: full normalized N51 divisor at the other finite supports and infinity.
