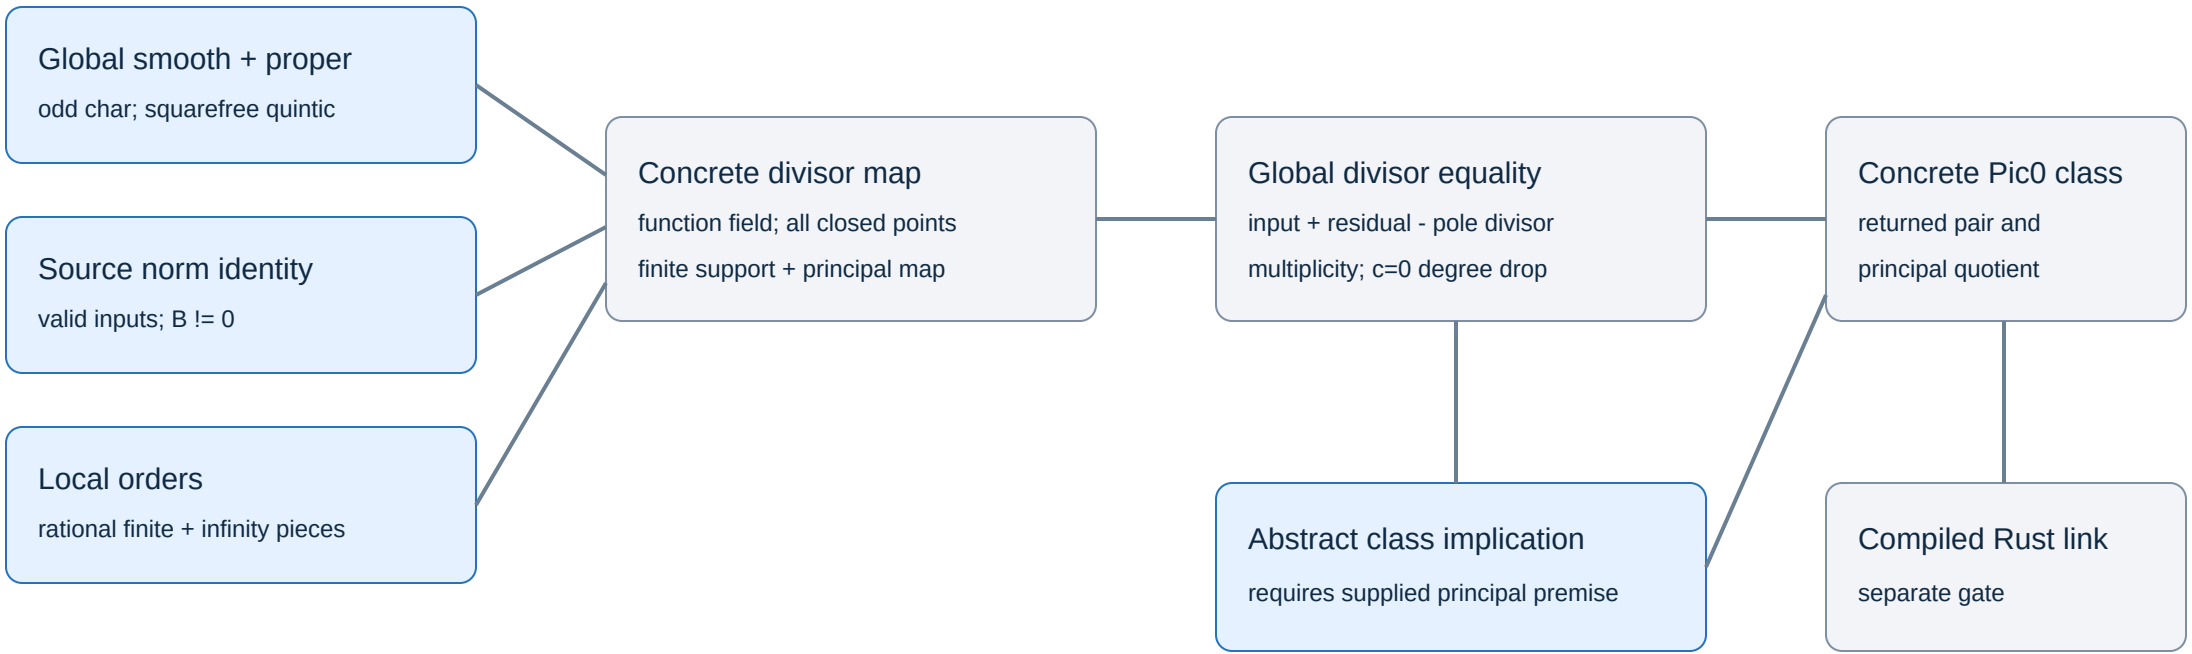
Source-style 2+2: global divisor and Pic0 proof boundary

Read-only declaration inventory at isolated commit f0c4308b62fa6a2621637d7fd02a13a148881ed4; no measured data



Blue: existing checked declarations. Gray: open construction or specialization. Arrows: intended proof dependencies.

A local point order does not by itself determine a global principal divisor or a Pic0 class.
