APS instrument: one cold timeline; no performance experiment has run
SETUP
explicit parameters
curve/orbit checks
TARGET QUERY
live validation
seeded labeled base
TARGET PDP
equations + export hash
F4 + exact/legacy roots
uninformative / exhaustive
abort
RELATION CHECK
all signs; require B != 0
independent label/sum check
DESCENT
A/B modular recovery
RECOVERY CHECK
producer + independent
scalar equality check
error / deadline
OUTCOME
checked answer in budget
or retained failure/partial
OPEN: complete native pricing
full-set/metric audit, native experiment export
frozen protocol + checkpoint + EKS
