All actual bounded pairs
91 coefficient shapes -> 10 pairs
8 split-u pairs; separable f
All 100 polynomial runs
actual full gcd / Bezout
composition / unit / remainder
Unique output
cantorAdd defined first
Finite group transport
all 100 additions match cantorAdd
Actual (X,1) order 5
proper cyclic subgroup
all 5 members split
Direct universal negations
1 != 4/5 including identity
1 != 7/9 excluding identity
