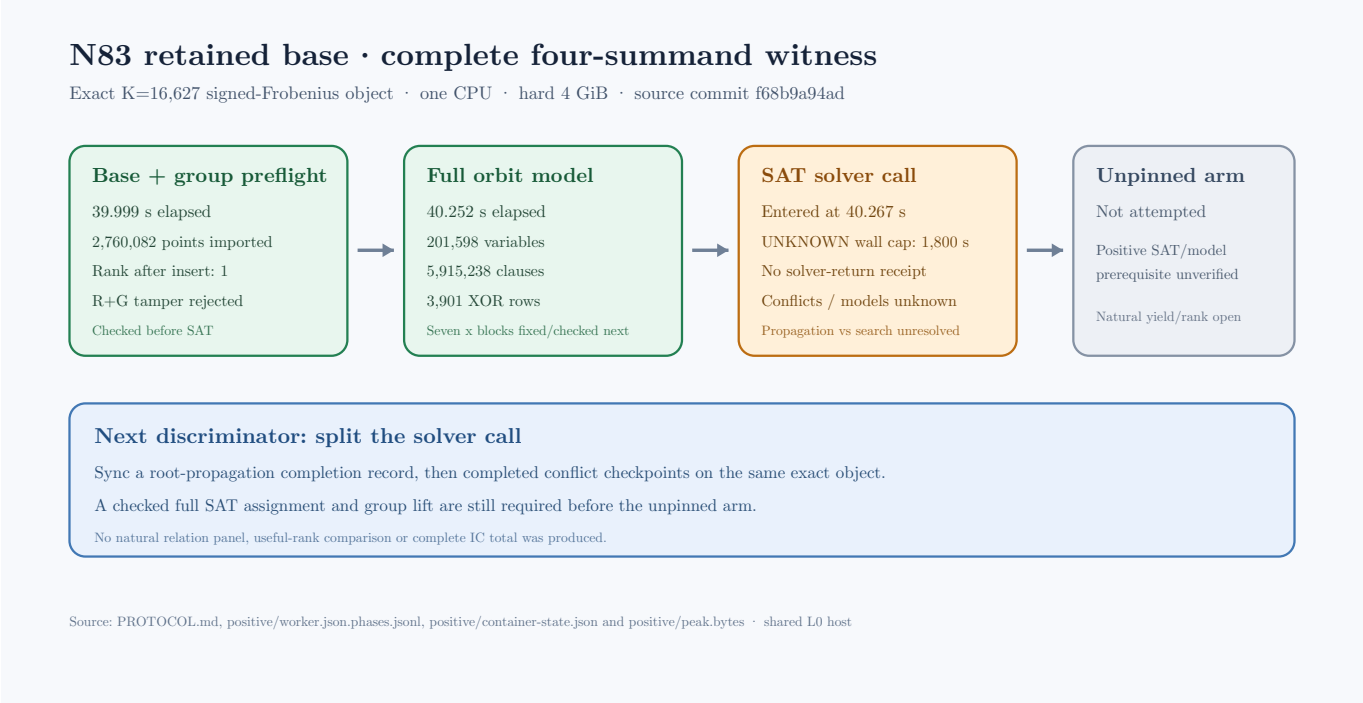
N83 K = 16,627: phase-observable complete witness

Run: 2026-10-18 UTC. **Curve:** `icv1-f2m83-tm6151469093347-debefd74`. The protocol (`PROTOCOL.md`) preceded implementation. The exact retained signed-Frobenius object has 16,627 columns and 2,760,082 points. Worker source is bound to clean pre-stack commit `f68b9a94ada669360f88be4d8c8a5288cca55d73`; `source-files.sha256`, `inputs-before-run.sha256`, `BUILD_RECEIPT.md` and `COMMANDS.md` retain source, input, binary, build and test checks. The complete source-linked account is `RUN_REPORT.md`.



Frozen positive arm

Measure	Observed value
Status	`UNKNOWN_wall_cap`
UTC interval / outer exit	03:16:27–03:46:27 / 124
CPU / hard memory / swap	1 / 4 GiB / 0
Cgroup peak / OOM	2,661,351,424 bytes / false
Base import / group preflight	39.982 s / 39.999 s elapsed
Full model / SAT entry	40.252 s / 40.267 s elapsed
Model size	201,598 variables; 5,915,238 clauses; 3,901 XOR rows
Group preflight	rank 1; tampered R+G rejected
SAT return / conflicts / models	unknown / unknown / unknown
Worker JSON / unpinned arm	absent / not attempted

`positive/worker.json.phases.jsonl` contains five appended, flushed records. The full orbit model and seven x-block pinning completed before the solver was entered. No solver-return record was written before the outer cap. The delay lies within the solver call, but the receipt cannot distinguish its initial propagation from later conflict search. No SAT-produced field model, group lift or post-SAT rank was returned. The positive prerequisite for an unpinned search was therefore unverified.

The outer outcome, container state, host configuration, timestamps, cgroup peak and empty stdout/stderr are retained under `positive/` and beside this report. These shared-host L0 walls are descriptive, not a complete IC cost or fastest-tool comparison. A separately frozen root-propagation checkpoint and completed conflict receipts are the next discriminator. Natural-query yield and useful-rank comparisons across the K=16,627 and near-size-matched bases remain open; the canonical IC scoreboard is unchanged.
