R123: normalized x=0 branch census

5 November 2026 | exact R116 and R119-R122 inputs

Each F2 base place has one simple and one tame-seven place.

y0_e1: base e=1, x degree=16

y0_e3: base e=3, x degree=48

y1_e1: base e=1, x degree=16

y1_e2: base e=2, x degree=32

Both places have F2 residue degree 2.

Eight normalized places; x=0 divisor degree 112.

Seven-edge residual relation is W^7=1 over F4.

Independent degree audit and finite Lean arithmetic: pass.

Next: evaluate N51 on these eight places.
