Fourteen-target audit: proof components and open obligations
Original request
All 14 items + Lean
Exact source hypotheses
BK excludes r | q-1
Diem changes projection
NIST screens special curves
Local Lean components
S3 existence equivalence
Frobenius / branch / subgroup lemmas
Known degree-3 control
Development checks
Actual Rust routines: 3 tests
Separate C++ fixture
Transitive axiom gate
Concrete execution dependencies
Checkpoint upload unavailable
No second selected host
Independent signed review pending
blocks experiments / replay
Remaining requested work
Censuses, pairings, Jacobians
msolve runs, Smart / rho tests
Full structural proof bridges
