Twist-assisted IC: experiment dependencies
Bounded executions recorded; original full campaign remains partial
E00: polynomial preflight
Five identities + native certificates + Lean proofs
E01: trace fibers
Nine exhaustive finite trace/fiber controls
E10-E12: covers and maps
Ten checked class transfers; independent orders
Three positive toy gluing cases; P-521 module candidate
E02-E06: restricted bases
Coordinate / slope / norm / divisor families
1,179 configured census rows; broader families open
E16-E17: conditional ingress
Public applicability + known pairing positive control
Two 254-case height panels; target-lift/cost open
E07-E09: equivalent systems
240 projection cells; three bounded solver attempts
Full grid, signature reference and costing open
E13: restricted cover images
Bounded image census; destination solver/cost open
E14: representation controls
Three explicit degree-seven maps + all three duals
E15: combined pipeline panel
1,920 records; 1,704 verified identical replays
216 empty cells; calibrated full cost/other host open
