Final worker build plan: accepted as preparation only

Worker build -> executable bytes; root libtest -> executed test evidence

Root path: cryptanalysis::ecbench::three_leads::pencil::tests

Existing 3 guards: fake dispatch / shared meter / unwind / ledger

Full cargo test --release --lib remains unfiltered and separately required

Old 16GiB / 600s timeout occurred during compilation: zero tests

Refresh final source/cache pins; enforce aggregate resources before release

Actual Some/None positive fixture is separate source preparation (T1566)
