Run report: Cheon wide chunk sessions (36 to 56 bits)

Study: ../../REPORT.md; protocol and amendments: ../../PROTOCOL.md.

- **What ran:** 22 `ecbench run` chunk sessions, one per family and size, each 24 targets × 2 arms = 48 runs, at L0 (operation counts only), `--allow-busy` on the CPUs of the container's cpuset, then `ecbench verify --replay-all`.
- **Hosts:** a shared 4-core cloud container, replaced once at about 05:40Z; binaries per ../../sessions/BINARY.txt.
- **Wall times are descriptive only** (concurrent lanes, shared host); no wall figure is admitted.

session	session id	records	verified	replays reproduced	binary	finished (UTC)
