Recorded run: a-c6-level4

Session ECBS1h373e802906ea; spec ECS1h6174e14f5315. Source commit 68e6c8b12d9185824bc071d7bc29ce2c2b5a2372. Public synthetic, independent one-target solves.

Requested 768; recorded 768. Statuses: {'verified': 768}. Required isolation L0; wall time is descriptive only.

Arm	Attempts	Verified	Charged GAE sum (lower bound)	Peak RSS KiB
rho-neg	768	768	5195762.0	128068

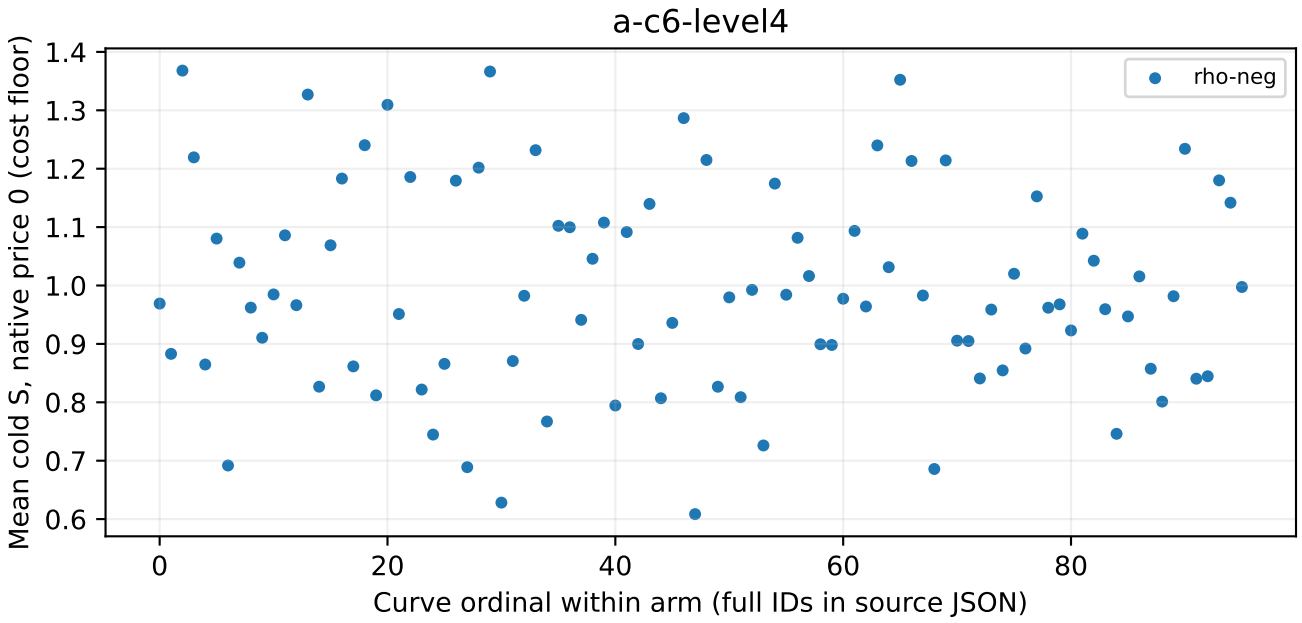

Figure 1: Native recorded means; no timing or speed ranking.

Raw records: research/conductor_gap_replication_20261025/sessions/a-c6-level4/records.jsonl; spec and seeds: that session's spec.json. Host: host.json; exact replay: research/conductor_gap_replication_20261025/sessions/a- All per-curve 0/0.1/1 GAE bands, native counters, resource and failure totals: analysis/diagnostics-A.json. The plotted means are native ecbench summaries of verified records. Missing prices remain unknown. These observations alone admit no full-cost method ranking. Calibration sessions are excluded from primary inference.
