R119: F4 translation of marked23 lambda edges

5 November 2026 | exact R118 coefficients | two conjugate F4 roots

Translate T=alpha+Z after the first certified Newton edge.

y0_e1: translated orders [8, 23, 23, 0, 0]

y0_e3: translated orders [8, 23, 23, 0, 0]

y1_e1: translated orders [28, 23, 23, 0, 0]

y1_e2: translated orders [16, 23, 23, 0, 0]

Near each F4 root: y0/e1 and y0/e3 have 8 corrections of order 1.

y1/e2 has 8 corrections of order 2.

y1/e1 splits: one correction of order 5, seven of order 23/7.

Independent F4 bit planes and finite Lean edge checks: pass.

Next: lift the repeated eight-root edges and evaluate N51.
