Literature sweep 2026-11-07: sources → knowledge-base entries / leads → effect (all source claims reported, not checked here)
arXiv 2611.00517 Dias-Lima: OpenAI ETH constants
arXiv 2610.41622 Majdoddin: Anthropic 3-SAT crossovers
arXiv 2611.02650 MIT Hardness Group: ETH false, SH plausible
arXiv 2611.06813 Chan et al.: hyperclique, Max-3-SAT 2^0.99n
arXiv 2610.41048 Kozma: #PPM from #3SAT
KN-LIT-caa51d (ETH disproof)
LEAD-ICB-decomposition-encoding-and-sat
Galactic confirmed with constants;
no change to closed_obstructed
arXiv 2610.18914 Lu: shared-leg separation, any char.
arXiv 2611.04175 Li: exposition, char.-free (summary)
arXiv 2610.13971 Sun: claims omega = 2 (unverified outlier)
arXiv 2610.10494 Uznanski: rectangular, char. 0
ePrint 2026/2622 Gao-Hu: sieving if omega < 9/4
KN-LIT-58d42d / KN-LIT-eef882 (omega <= 9/4)
LEAD-ICE-first-fall-degree-assumptions
9/4 in char. 2: three routes reported;
no number changes
ePrint 2026/2625 Xiong-Wang: factoring n^1.5532 log q
ePrint 2026/2560, 2621, 2253, 1969, 2470 (assessed 2026-10-31)
ePrint 2026/1711 Budroni et al.: PKP/PEP (code-based)
Decomposition root finding
(cost model, LEAD-ICE engines)
crypto research/ic_mega_pass_20261031
(already assessed; leads named there)
No ECDLP bearing (discarded)
Asymptotic only; no row changes
No new action
