R127: degree-7 marked-23 base fiber

F128 = F2[a] / (a^7+a^6+a^3+a+1)

f23(a,Y) = (Y+123)(Y+90)^2 Q4(Y)

Q4 = Y^4+66Y^3+83Y^2+38Y+25; irreducible over F128

Factor	Length	Interpretation
Y+123	1	simple F128 root
Y+90	2	double F128 root
Q4	4	irreducible quartic

Source-order length 1+2+4=7 over F128; normalized ramification unresolved.

Independent GF128 check, Lean product, byte replay, changed-source gate passed.

Result SHA-256: 87b87127fab784f9bf48239081194a9ebcf67456cb4204c3e1d53956e9221e30

Next: Newton expansion at the double root Y=90.
