APS follow-ups | proposals, no measured speedups
Existing APS implementation
6 encodings + replay/export components
L1: nonhorizontal chart
U = t^2; V = c/t
2 parameters; horizontal exception
L2: F4 trace pool
Reuse native record/replay
Mismatch -> charged fallback
L3: grow base
Disjoint new-tuple cells
Incomplete old regions retained
L4: unequal profiles
Joint size + elimination choice
Actual informative yield
Pending: exact correctness checks
Complete witnesses + informative recovery
Refusal, exception and timeout cases
Pending performance admission
Successful checkpoint + full accounting/replay/export
Frozen held-out 4-size protocol
Pending: cold complete-cost comparison
Learning, setup, failures, decoding, memory
Keep negative and inconclusive outcomes
