Run report: session A (ECBS1h9e263e582e51)

Spec specs/A-1k-8k.json (ECS1h51f498729d24), commit e59331c96 (clean), binary c1378033…41c5, host env class ECBENV2h6639ae09b95e (4-vCPU Xeon VM, Linux 6.18), ecbench run --wait --cpus auto, run CPU 3. Started 2026-10-20 06:57 UTC, finished 08:14 UTC.

Workloads 8 targets (target seed 20261019) on icv1-fp32-t7319-90da43e9. **Rounds** 5 measured + 1 warm-up, alternate order. **Arms** rho-neg (reference); scalar-N, batch-N and blocked-N for N ∈ {1,024, 2,048, 4,096, 8,192} (ic.pipeline, prime-abscissa:size=N, incremental-gauss; oracles mitm:negation_folded=1, mitm-prime-batch:m=2, mitm-prime-blocked:m=2); blocked-4096-aa (control).

Runs 672 planned, 672 written, 672 verified, 0 failed or timed out. **Isolation earned**: IC runs mostly L1 (hypervisor steal; 0–11 of 40 per arm reached L2); rho-neg L2 (39) and L1 (1). **Audit** OK, 24 exact replays (sessions/A-1k-8k.audit.json).

Measured values (means of 40 measured runs per arm)

arm	S (measured)	set-up wall	relations wall	LA wall
rho-neg	0.966 [0.797, 1.125]	—	—	—
scalar-1024	31.851 [30.428, 33.108]	216.5 ms	733.6 ms	10.0 ms
batch-1024	31.851	117.5 ms	720.1 ms	9.8 ms
blocked-1024	31.851	55.2 ms	804.8 ms	10.2 ms
scalar-2048	71.816 [71.193, 72.342]	1.435 s	362.5 ms	33.1 ms
batch-2048	71.816	739.3 ms	361.3 ms	32.4 ms
blocked-2048	71.816	237.9 ms	420.0 ms	33.9 ms
scalar-4096	260.011 [259.826, 260.190]	8.398 s	209.9 ms	127.6 ms
batch-4096	260.011	3.817 s	203.1 ms	119.5 ms
blocked-4096	260.011	1.037 s	245.0 ms	137.7 ms
blocked-4096-aa	260.011	1.056 s	242.1 ms	126.4 ms
scalar-8192	1026.139 [1026.010, 1026.256]	43.60 s	134.3 ms	450.8 ms
batch-8192	1026.139	20.48 s	135.2 ms	463.1 ms
blocked-8192	1026.139	5.294 s	148.4 ms	456.6 ms

S intervals from ecbench table (analysis/table-A.md); the three oracles of a size share one S. Wall times are descriptive (L1). Equality (432 of 432 executions identical, A/A included) and the derived ratios are in analysis/A-1k-8k.json (scripts/analyze.jq).

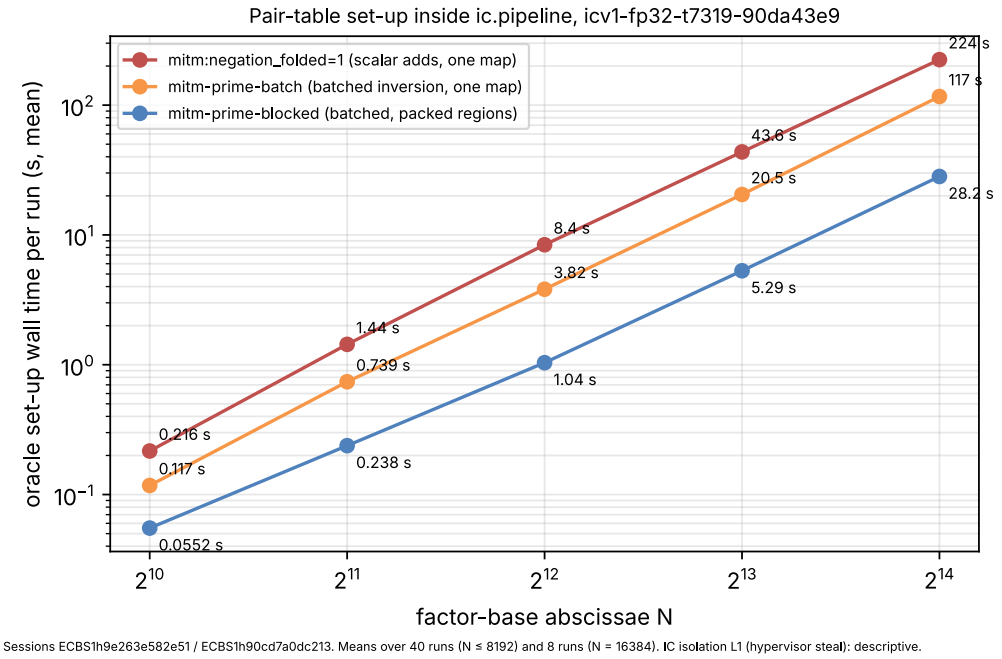

Figure 1: Set-up wall per run against N; sessions A and B (this run: N ≤ 8,192).

Records: `sessions/A-1k-8k/records.jsonl`. Observations only; the interpretation is in the study README.
