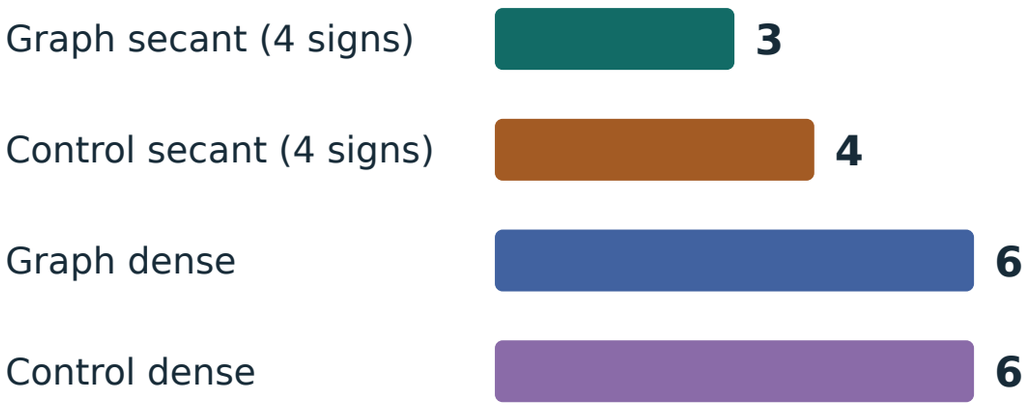
Split-graph bases: degree and all-branch work

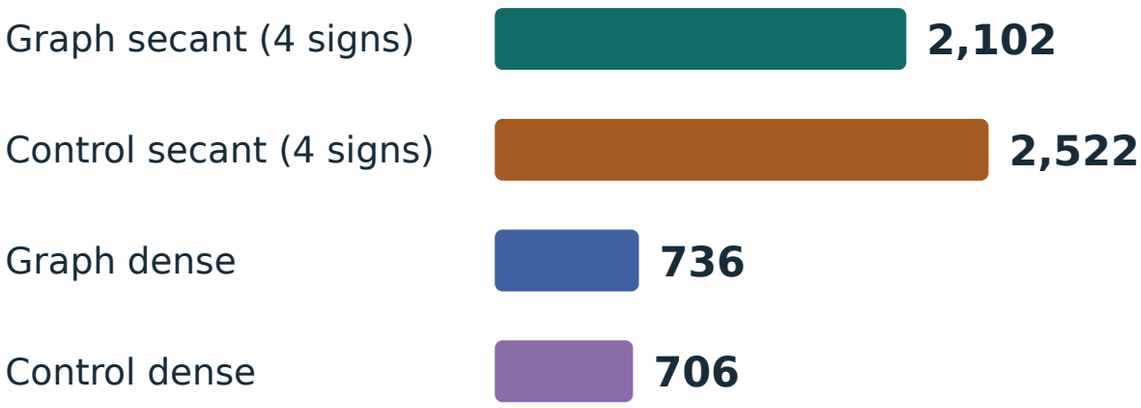
run-20261031T201044Z · stock neogb F4 · exact counts; clocks are diagnostic

A Toy handled degree



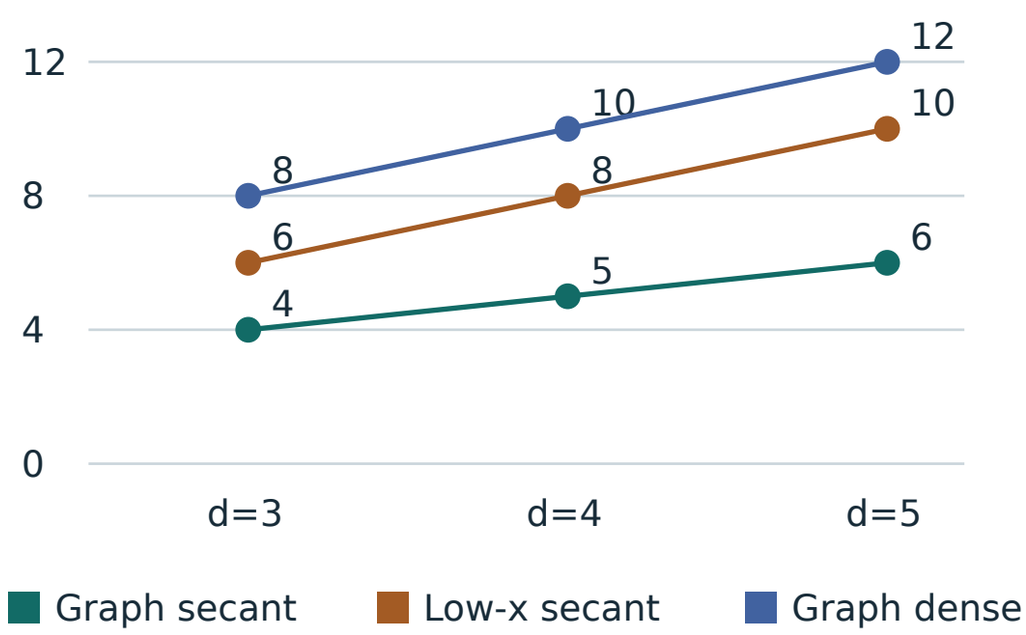
18 targets/arm; degree=max(input, selected-pair LCM).

B Toy reduced rows (all branches)



All four sign branches charged; dense has one solve.

C Larger degree comparison (F83)



D Graph-construction attempts

Field	d=3	d=4	d=5
F83	1	4	23
F101	3	10	260
F127	1	2	62

9/9 prospective cells accepted within frozen caps.

Lower degree did not lower the all-branch row proxy.

14,194/14,220 original extractions verified; 26 caps retained. Separate exact saved-basis replay: 14,220/14,220.
