Actual monic division remainder V
Degree below five over coefficient algebra A
Old rows: V0, V1, V2, V3, V4
New rows: s V(q), V1, V2, V3, V4
Public q and nonzero s
Same constant K-linear input span
PCC-20261114-bcec52 (unsigned)
Budget D admits every old AND new input
Identical FULL iterated closures at D
Derived-row multiplication included
Actual binding: PCC-20261114-d07690 (unsigned)
Next: bounded derivations or a different mechanism
Lower admission budgets / nonlinear charts remain open
