CHECKED: ordinary filtered closure
and last-fall/refutation equivalence
CHECKED: affine u-squared coefficient
and three-point rigidity
CHECKED dependencies:
top injectivity + degree-four relation
MISSING: degree-five normalization,
resultant, grid inversion, point bridge
CHECKED: actual six inputs
1 not in V(F,4)
MISSING: weighted syzygy
and Koszul quotient definition
OPEN: complete Lean theorem
exact first / last pair (4,5)
