Prospective coherent crypto library build review

Verified custody: 1103 source + 506 dependency + 145 compiler/runtime files

Exact freeze -> real inherited pipe -> one owned rustc process group

300s outer envelope | 8GiB AS | one jobserver-managed implicit slot

4GiB sampled output threshold: overshoot possible; retained evidence

Success requires exit0 + passed receipt + unchanged inputs + confirmed reap

Source review only: no compiler, exporter test or scientific run by reviewer
