Interim native export review: correction pending

2026-10-29T23:12:22Z
Public synthetic known-answer mathematical research. Evidence observations only; no judgments, new cohort executions or qualification.

Zero executions refers to this named plan-only input, not historical experiments. Per-source software scopes are distinct and counts are never pooled.

Plan-only observations

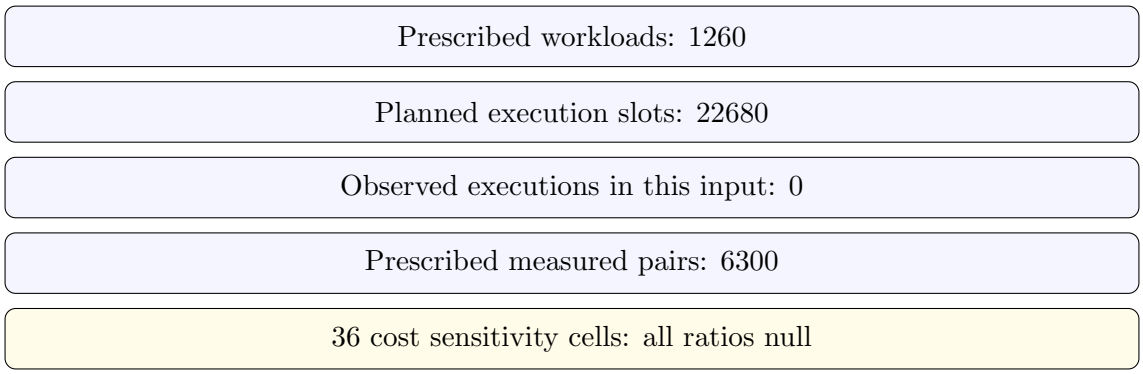

Diagram rather than a performance graph: this input contains no observed empirical ratios. Counts are read from source [plan]; no rates or uncertainty estimates are inferred. Warmup execution slots prescribed: 3780. No empirical cost ratio is available in this snapshot. Software validation and prepared inputs do not constitute independent protocol, binary, resource or launch admission.

Scoped source observations

[**review-scope**] Reviewed source08e8ab38d only. Corrections are pending and auto-merge is held. Focused software behavior and source review, not empirical research executions; no validation claim for the in-progress fix.
cohorts_executed: false
experiments_executed: false
jobs_launched: false
review_mode: "read_only_repository_focused_software_reproduction"
reviewed_head: "08e8ab38d3de525779da57f27e14e7e9a81a2d21"
[**finding-1**] Independent review observation at source08e8ab38d; reported status distinguishes reproduced behavior from source/fixture confirmation. Correction pending; no conclusion about the corrected implementation.
finding_id: "NCX-01"
observed: "Packaging returned zero findings and emitted status=succeeded with verification.status=verified."
status: "reproduced"
title: "Missing planted-answer check is exported as verified"
[**finding-2**] Independent review observation at source08e8ab38d; reported status distinguishes reproduced behavior from source/fixture confirmation. Correction pending; no conclusion about the corrected implementation.
finding_id: "NCX-02"

observed: "Only a schema string, manifest/count fields, three self-declared source hashes, and a mapping hash are checked. Most protocol-pinned analysis sources, analyzer binaries, and build receipt are not attached or verified."
status: "source_and_existing_fixture_confirmed"
title: "Native analysis cost output and producer identity are not validated"
[**finding-3**] Independent review observation at source08e8ab38d; reported status distinguishes reproduced behavior from source/fixture confirmation. Correction pending; no conclusion about the corrected implementation.
finding_id: "NCX-03"
observed: "Packaging and check_export returned zero findings with 15 measured rows and no warmup rows."
status: "reproduced"
title: "All protocol-required warmups can be omitted without a finding"
[**finding-4**] Independent review observation at source08e8ab38d; reported status distinguishes reproduced behavior from source/fixture confirmation. Correction pending; no conclusion about the corrected implementation.
finding_id: "NCX-04"
observed: "check_export returned zero findings."
status: "reproduced"
title: "check_export does not validate its backend_record integrity fields"
[**finding-5**] Independent review observation at source08e8ab38d; reported status distinguishes reproduced behavior from source/fixture confirmation. Correction pending; no conclusion about the corrected implementation.
finding_id: "NCX-05"
observed: "Packaging returned zero findings and copied the string into measurements.counters.native.actual."
status: "reproduced"
title: "Counter values are neither required nor constrained to exact nonnegative integers"
[**finding-6**] Independent review observation at source08e8ab38d; reported status distinguishes reproduced behavior from source/fixture confirmation. Correction pending; no conclusion about the corrected implementation.
finding_id: "NCX-06"
observed: "Packaging returned zero findings and retained the impossible values."
status: "reproduced"
title: "Impossible restore metadata is accepted"

Evidence and limits

No software test count is an empirical target count. Missing costs stay null. Resource authorization is limited to its explicit source scope; no budget, deadline, infrastructure approval or independent review is inferred. The prior 19:06 report and its Python generator remain historical artifacts; new reports use this native renderer. [**plan**] named plan-only input; not historical experiments
