Actual public curve branches
z(x)²=f(x), cubic degree window
Singular public Hankel matrix
Kernel is one scalar line; corank exactly1
Continuous field correction
can make determinant zero
Higher-corank destination
excluded in this stated family
Must also satisfy point equation
Delta=0 or Delta=-2z
Frozen F17 control:4 off-curve repairs
Rank1 passes; full norm fails
1 valid repair restores known fixture
General discrete search remains open
