Public native input
Exact ECCp-131 parameters; no scalar supplied
u64 values
Twelve deterministic prime bases
Supplied large-prime proof
Verify dependency primes, F, Fermat and gcd
Uncovered large values
Existing exact AKS fallback
Existing curve / generator / cofactor / target checks
ECCp-131 proof input passes its parameter budget
Same contraction admission guards
Functional metadata available in leaf range?
Free-input interface
Ordered search; first valid word
Derived interface
One complete pass; least valid word
Other graphs / control option
Original prefix counts / recursion
Full graph and relation-certificate replay
Same selected word and complete seeded certificate
Matched profiling and performance evaluation
BLOCKED: checkpoint / authenticated execution
