Equal total rank does not imply equal target information

Derived linear systems over F7; synthetic correctness fixtures, not cohort measurements

$x = 0$

$\operatorname{rank}(A) = \operatorname{rank}([A\ b]) = 1$

k remains arbitrary

$k + 3 = 0$

$\operatorname{rank}(A) = 0$; $\operatorname{rank}([A\ b]) = 1$

$k = 4$ is determined

Both augmented row spaces have rank 1. The existing collector already checks a target pivot.
