Run report: sparse-FGLM linear stage of `jv_cover`, run-20261018T2138Z

Observations only. Interpretation: `../../REPORT.pdf`.

What ran

- **Runner:** `research/jv_cover_sparse_fglm_20261018/run.sh <jv_cover> <this dir>`; one release binary (sha256 in `raw/versions.txt`), arm chosen by `JV_LIN=dense|l1a|sparse`.
- **Experiments (same seeds in all arms):** `--exp ccov --sizes 53,101,251 --seeds 1 --residuals 100 --constructed 20 --max-degree 24 --budget 300`; `--exp dlp --sizes 53,101 --seeds 2 --rho-runs 4 --check-every 64`.
- **Host:** Intel Xeon 2.80GHz, 4 vCPU shared, isolation L0.
- **Completed:** 6 of 6 invocations, exit 0 (`raw/walls.txt`; wall times 43–49 s for ccov, 1081–1695 s for dlp, under varying contention: observation only).

ccov (means over 120 tests per prime)
